No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                         240
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Description

Hoverlapping but nonidentical binding sites on CD2 for CD58 and a second ligand CD59.";
Science 256:1805-1807(1992).
-!- FONCTION: CD2 interacts with lymphocyte function-associated antigen (LFA-3) and CD48/BCMI to mediate adhesion between T cells and other cell types. CD2 is implicated in the triggerring of T-cells, the cytoplasmic domain is implicated in the signaling
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             STRUCTURE BY NMR OF 25-129.

-! SUNCIION: May participate in adhesion reactions between T lymphocytes and accessory cells by homophilic interaction.
-! SUBCELDUIAR LOCATION: Type I membrane protein.
-! TISSUE SPECIFICITY: Lymphocytes.
-! SIMILARITY: Contains 2 immunoglobulin-like C2-type domains.
-! SIMILARITY: Contains 2 immunoglobulin-like V-type domains.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     (Potential).

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
